

VALVE AND FLOW CONTROL SPECIALISTS
SERVICE AND RELIABILITY

VALVES:- POWER GENERATION INDUSTRY

Valve and Flow Control Specialists is an Australia owned and operated company supplying the Power Generation sector in most cases with off the shelf process valves such as:

Parallel Slide Valves	High Performance butterfly valves	Steam Globe valves
Steam Check Valves	Safety Valves	Steam Traps & accessories
Boiler Controls	Blow Down Valves	Rotary Control Valves
Turbine Controls	Conductivity sensors	Temperature Regulators
Linear Control valves	¼ turn control valves	Pressure regulators
Microflow valves	Instrumentation valves	Pressure and Temp gauges
Steam Injectors	Mixers	Condensate Pumps

From the humble bronze steam globe valve in low pressure steam lines to class 2500 cast steel steam valves and automated Control valves found in todays modern power stations VCS can address your needs.

Our standard Petrochemical valves such as steel gate globe and check and bellows valves or the industrial stainless range of valves from gates to checks to strainers also are dotted around plants from Melbourne to Cairns.

Quality Industrial thermoplastic valves such as ball, globe, regulators, butterfly valves, check valves, solenoid valves for chemical applications can also be had ex stock Australia. Full PTFE or PFA valves for laboratory applications are also available.

Apart from the stock items VCS also source and fast track specialist valves made of materials such as Titanium and Hastelloy in configurations such as control valves and ball valves.

If we are not already of service to you in these areas we would certainly appreciate the opportunity to quote on your requirements. All our sales staff have at least 20 years in the valve industry and welcomes your enquiries.
