Brass Machine Temperature Gauges (Thermometers)
Bottom Entry and right-angle connection
110mm 150mm and 200mm face

FIGURE NO. BTG110-BE

FIGURE NO BTG150- BE

FIGURE NO BTP1200-BE

VCS End Type: ALL ½" BSP option NPT

Material: Brass process connection

Accuracy Class: Din 2.5

Temp process Max 300 deg C

Case:- Brass

Capillary tube Glass

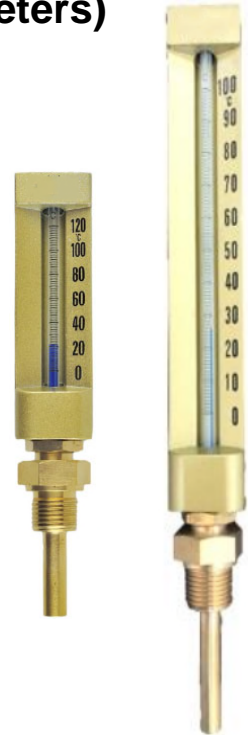

Scale 0 – 100C, 0- 200 C, 0 – 300C

These are used on Industrial Machinery, Marine / Shipping and HVAC duties.

These glass thermometers are a machine gauge, there are no moving parts, no material fatigue or energy requirements, they are consistently accurate and housed in a solid case.

110mm face has a width of 30mm, 150 and 200 is 36mm

Higher temperature versions are available in steel from VCS. Standard stem lengths are 50mm, 63mm and 100mm...

Other pressure gauges include Stainless case brass entry, full Stainless steel, differential pressure, diaphragm sealed, Capsule gauges liquid filled options as well as Contact Digital, Dial bimetallic and capillary Temperature gauges.

Uncontrolled document subject to change without notice
